

## Title?

A play written by:  
Saury, Soo-Min, Habib, and Himanne

### Characters:

Lion: Saury  
Leopard: Soo-Min  
Tiger: Habib  
Gorilla: Himanne  
Narrator: ???

Narrator (setting):  
One night 4 African animals gathered around a campfire to talk about  
what they would eat that night . . .

Lion:  
I'm hungry! Why don't we eat our dinner!

Leopard:  
I'm hungry too! What happened to all our food?

Tiger:  
Why don't we eat a gazelle?

Gorilla:  
All the gazelles are gone since all the trees are being cut. They used to eat  
the leaves for food. I don't even have any bananas to eat!

Tiger:  
Why don't we try eating ants?

Narrator:  
All the animals try the ants.

All animals in unison:  
YUCK!

Lion:  
Why are all the humans cutting so many of the trees down?

Leopard:  
They're trying to kill us and take away all our food!

Tiger:  
I'm so hungry I could eat a Lion!!!

Lion:  
Eh?!

Gorilla:  
They're cutting down all the trees to make paper!

Tiger:  
Hey! Can we eat paper?!

Lion:  
Maybe the humans need so many trees to make paper because  
they don't know about recycling?

Narrator:  
Cote d'Ivoire supplies more trees for paper production  
than any other country in the world!  
Our rainforests have almost been completely cut down!  
A tree falls in the background and all the animals look on sadly.

Leopard:  
What is recycling?

Tiger:  
Can we eat it?

Gorilla:  
Lets ask the audience!

All Animals to the Audience:  
Do you know what recycling is?

(Wait for Audience reply)

Lion:  
Recycling means taking something you have finished using  
and making brand new things with them or using them  
in a new and different way.

All Animals:  
Let's recycle! It's good for the earth!

Narrator:  
Watch for future information about our 5 & 6 grade  
students' efforts to begin paper recycling projects at ICSA!

You can help!
